

INSTRUCTIONS FOR AUTHORS (FOR PAPERS IN ENGLISH)

TITLE OF THE PAPER (TWO LINES AT THE MOST)

Petar Petrović, Jovan Jovanović, *School of Electrical Engineering, ...*
John Smith, *EE Dept., University of ...*

Abstract - *In order to make provision for presenting as much material as possible and to simplify printing of the Conference Proceedings, these Instructions have been issued. They should serve as a guide for preparing manuscripts for the ETRAN Conference.*

1. INTRODUCTION

The original and two copies of the paper should be submitted to the Program Committee. The Committee will organize the reviewing and selection of the papers. However, the responsibility for the views, originality, statements, and quality rests exclusively with the authors.

The original should preferably be printed by a laser printer on one side of A4 (210'297mm) good quality white paper. The two copies may be printed on both sides. The length of a manuscript is limited to four two-column pages including figures, tables, etc. The language of the paper may be Serbian, English, or Russian.

The margins of two-column pages should be: top 2 cm, bottom 2 cm, left 2 cm, and right 1 cm. To keep printing costs under control a manuscript should fit a minimum number of full pages. If the last page is not completed, the two columns should be reduced to the same length.

The paper should preferably be written by Word, WordPerfect or LaTeX text editors using the Times New Roman fonts. The manuscript should be submitted in camera ready form.

2. SUBTITLE (e.g., THE METHOD)

The title of the paper should be centered at the first page of the manuscript and printed in bold letters, size 12 points. It should be spaced two lines of 10 points below the upper margin because of the heading, which the editor of the Conference Proceedings will insert later.

The names of the author(s) and affiliation(s) (in *italic*), in 10 point letters, should be printed one blank line below the title, as shown above. The remainder of the manuscript should be printed with line spacing 1 and 10 point letters used in this Instructions.

The title and names of authors should be followed by the abstract of the paper (in *italic*), 100 words maximum. The subtitles of the paper should be typed in 10 point bold capital letters.

3. SUBTITLE (e.g., MAIN RESULTS)

Equations should be numbered by the right margin, as shown below

$$J \frac{d\omega(t)}{dt} + F\omega(t) = T_e(t) - T_o(t). \quad (15)$$

If necessary, long equations may run across both columns.

4. SUBTITLE (e.g., CONCLUSION)

Illustrations (tables, figures, photographs, etc.) must be inserted into the text. Above a table it is necessary to mark its number and title in *italics* (e.g., Table 2. *Results of experimental measurements.*) At the bottom of an illustration there should be its number and an explanation (in *italics*). An example of illustration is shown below.

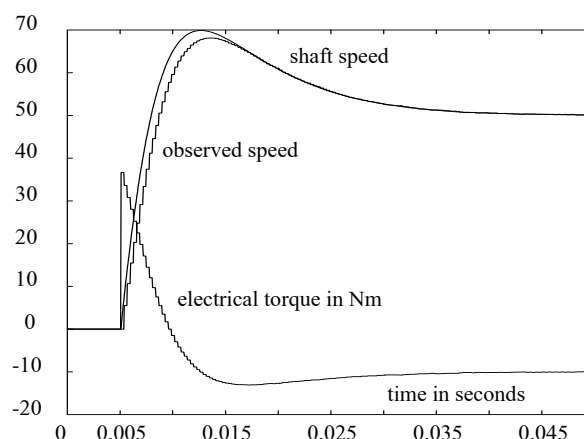

Fig.5 Simulation results.

REFERENCES

References should appear at the end of the paper, with items referred to by numerals in square brackets, e.g., "In [2], it is shown that ..." References must be complete and in the IEEE style and numbered in the order of appearance. Below are some examples of references.
